

## HVAC GRILLES - CLEANING INSTRUCTIONS

There are different cleaning options for each material.

### Aluminum Grilles

- **SATIN:** Rub grille lightly with a Scotch-Brite pad in the same direction until finish is restored. You can also use a cloth with a cleaner such as Windex, or simply a damp cloth.
- **MIRROR POLISH:** Polish the grille with NOXON. You can also use Windex or a damp cloth.
- **POWDER COATED:** Use only damp cloth. Absolutely no cleaners.
- **ANODIZED COLORS:** Use only damp cloth. Absolutely no cleaners.

### Stainless Steel Grilles

- **SATIN:** Rub grille lightly with a Scotch-Brite pad in the same direction until finish is restored. You can also use a cloth with a cleaner such as Windex, or simply a damp cloth.
- **MIRROR POLISH:** Polish the grille with NOXON. You can also use Windex or a damp cloth.

### Brass/Bronze Grilles

- **SATIN (NO LAQUER):** Rub grille lightly with a Scotch-Brite pad in the same direction until finish is restored.
- **SATIN (WITH LAQUER):** Use only damp cloth. Anything else will ruin the lacquer.
- **MIRROR POLISH (NO LAQUER):** Use NOXON to regain mirror finish.
- **MIRROR POLISH (WITH LAQUER):** Use only damp cloth. Anything else will ruin the lacquer.
- **STATUARY FINISH:** Damp cloth only. REMEMBER, without lacquer, the finish will tarnish over time.

**NOTE:** Do not use blue painters tape directly on your grilles. In some cases, the tape has removed the finish.
